

# PROGRESSION OF A PERSONAL INJURY CASE

## 1. Gather Information

First, we gather basic information, to include the accident report, and names of all treating physicians and clinics so we can get the records in support of your claim.

## 2. Treatment

Next, you keep treating with your doctors/medical providers and get better. This is your number 1 job/priority.

## 3. Treatment

Treatment continues with your doctors/medical providers. We are not ready to discuss money/settlement until you round the corner and are finally discharged.

## 6. Negotiation

Following the demand, we negotiate on your behalf in an effort to obtain a fair settlement.

## 5. Demand Letter

After discharge, and after we obtain your complete medical file, your attorney submits a formal demand letter to move the claim toward resolution.

## 4. Discharge from Medical Provider

Once you are fully discharged from your doctor, we will obtain your final records and bills, and then can move forward with preparation of a demand to the insurance company.

## 7. Settlement

If we can reach a fair settlement early on, you get your money. If not, we continue to work on your behalf.

## 8. File Lawsuit/Trial

When necessary, we will file a lawsuit on your behalf. While no one likes to go to trial, sometimes we have to do it.

## 9. Final Resolution

We continue to fight on your behalf until you get what you deserve.
